

School of Engineering  UNIVERSITY OF **St.Thomas**
Center for Microgrid Research Grants

U.S. Army Engineer Research and Development Center (ERDC)

A multi-year \$11M joint development program to address the reliability and resiliency of microgrids between University of St. Thomas Center for Microgrid Research and U.S. Army Engineer Research and Development Center (ERDC)

PI: Mahmoud Kabalan, Ph.D, P.E.

The program will develop, test, and demonstrate microgrid technologies including advanced and cyber-secure controllers and electric vehicles as power sources. This effort includes collaboration with ERDC CERL, MIT Lincoln Laboratory, Virginia Tech, Texas A&M, NC State, and Cal Poly.

TEXAS A&M UNIVERSITY.

VIRGINIA TECH.
